Actium

CRE INTELLIGENCE

BILATERAL OFF-MARKET TRANSACTION ENGINE

Buy-side capital meets sell-side inventory. Identities stay sealed.

We match confidential mandates with audited assets through a double-blind Dark Pool. For family offices, PE funds and CRE brokers.

MARKET FRICTION

Off-market deal flow arrives duplicated, unsourced and diluted

“The same hotel, three times this month: three channels, three asking prices, no source.”

01

Time

Every question travels up and down the chain.

02

Data integrity

A forwarded teaser is a photocopy of a photocopy.

03

Fee leakage

Each link in the chain wants its share.

04

Confidentiality

The asset circulates uncontrolled and arrives burnt.

THE ENGINE

A bilateral off-market engine: capital meets inventory, identities stay sealed

BUY-SIDE CAPITAL

Acquisition mandates

Ticket, typology, market, required return, exclusions. Family offices, PE funds and investors.

DOUBLE-BLIND DARK POOL

Hard filters, then True Fit

A match is proposed only when it clears both sides' thresholds. Nobody is named.

SELL-SIDE INVENTORY

Audited assets

Blind teasers where every figure traces to its source. CRE brokers and mandate holders.

THEN Both approve → Deal Room. Or search first → Blind Screening.

01 · DARK POOL

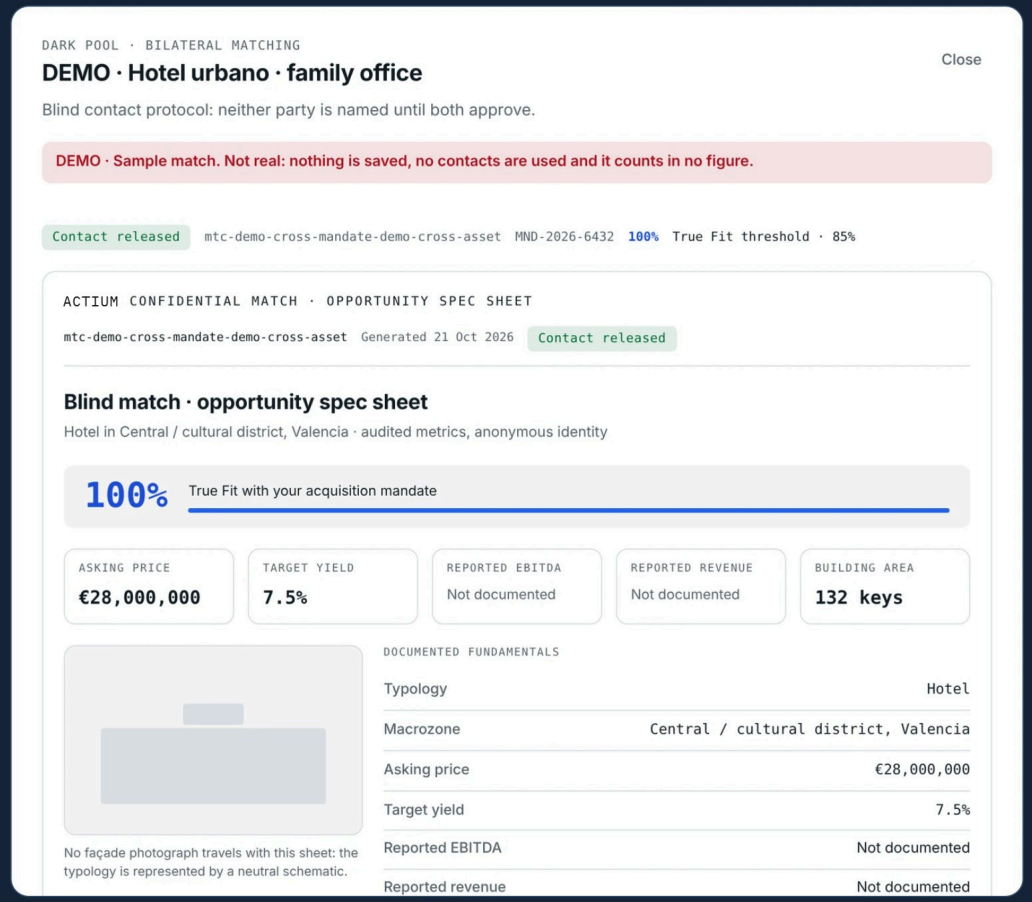

Fit first. Identity later.

HARD FILTERS Typology, ticket range, deal position, mutual authorisation, exclusions.

TRUE FIT Score from 60% to 100%; a match is proposed only above both thresholds (default 85%).

NEAR MISSES Crosses up to 10 points below threshold alert only the stricter side, discreetly.

MATCH ADVISOR Explains each score from the engine's own rules, not free-form AI.

APP SCREEN · BLIND SPEC SHEET · DEMO DATA

02 · DEAL ROOM

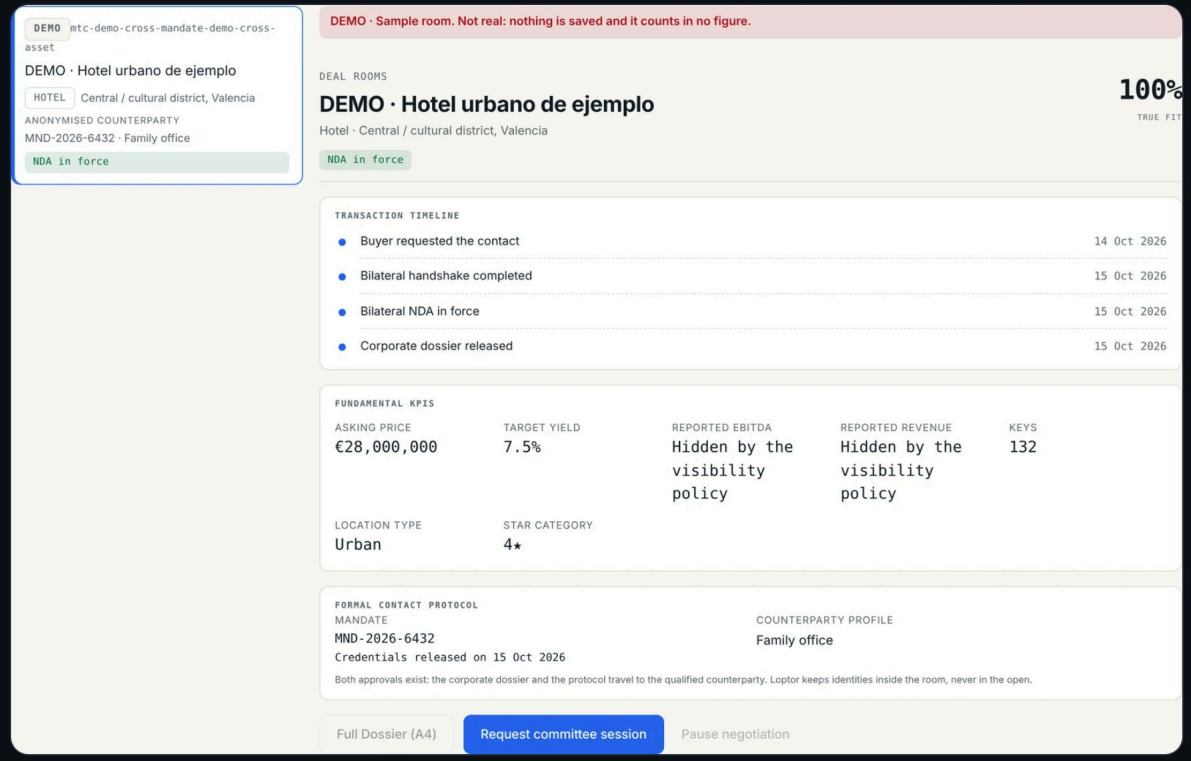

Opens only when both sides approve

HANDSHAKE Buyer requests, seller releases. Names and contacts appear only then.

ONE ROOM Match summary, timeline, key figures and the formal contact protocol.

BLIND CHAT Talk inside the room while identities stay sealed.

YOUR PROCESS Not a data room: NDAs are signed outside, between the parties.

APP SCREEN · SAMPLE ROOM · DEMO DATA

03 · BLIND SCREENING LIVE IN THE APP

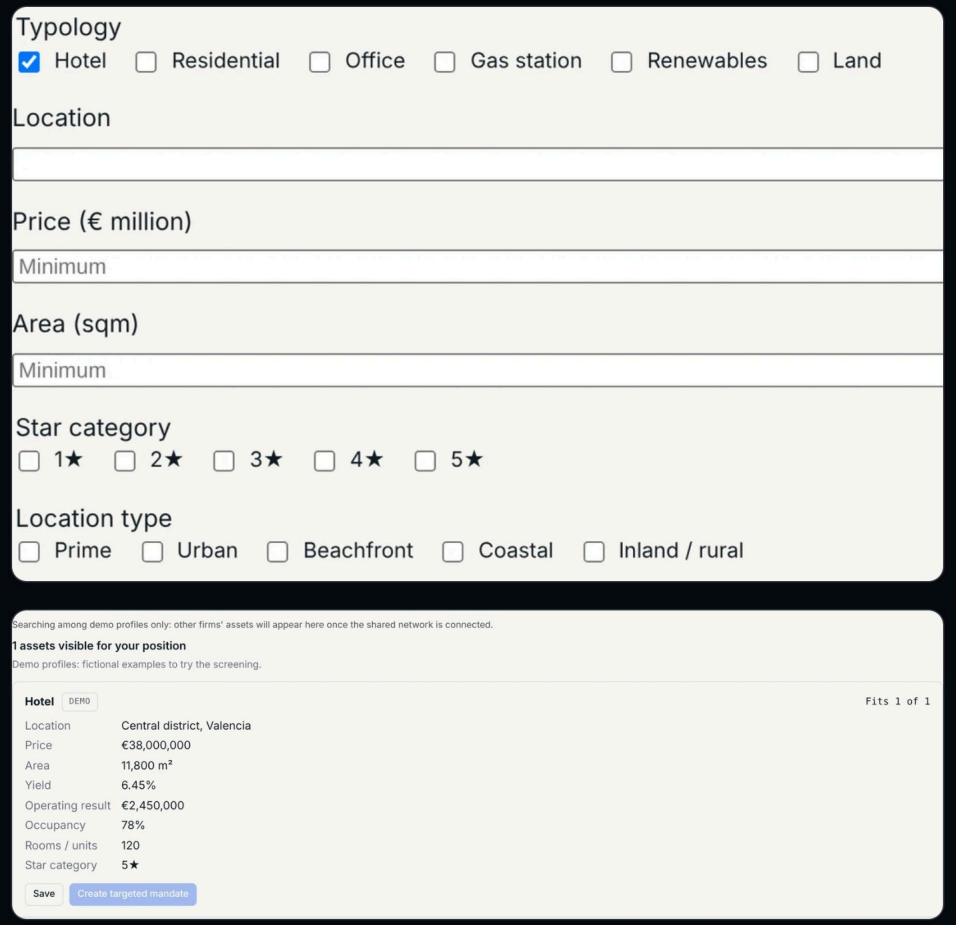

Source deal flow against your criteria

01 Declare your position, then set criteria: typology, location, price, keys, star category, location type, yield, occupancy.

02 Review blind cards. Identity is withheld; owners opt assets in.

03 Save, or create a targeted mandate for that asset and request the match.

Institutional and Enterprise plans.

APP SCREEN · DEMO PROFILE

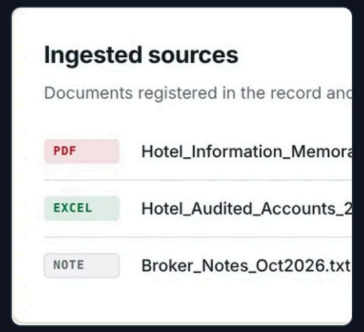

INSIDE THE ENGINE

From scattered materials to the right counterparty, in five stages

01

Ingestion

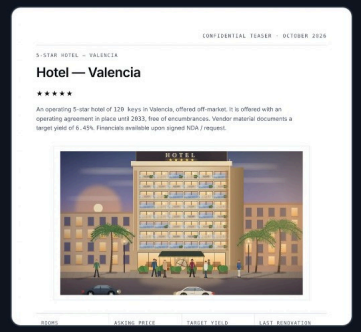

Documents, notes and models in.

02

Blind teaser

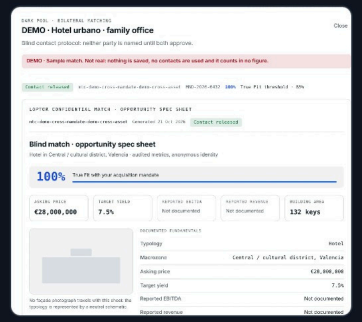

Institutional A4, identity withheld.

03

Dark Pool

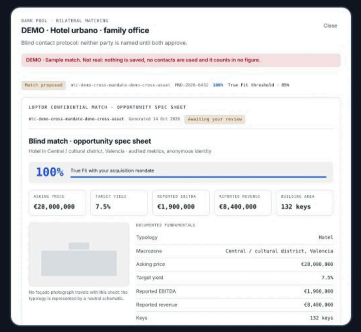

Assets and mandates, held confidentially.

04

Matching

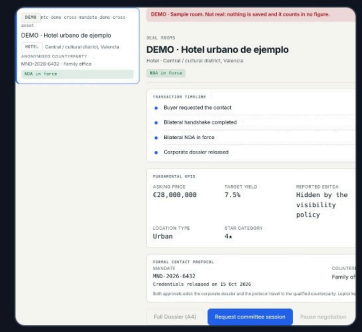

Hard filters, then a True Fit score.

05

Deal Room

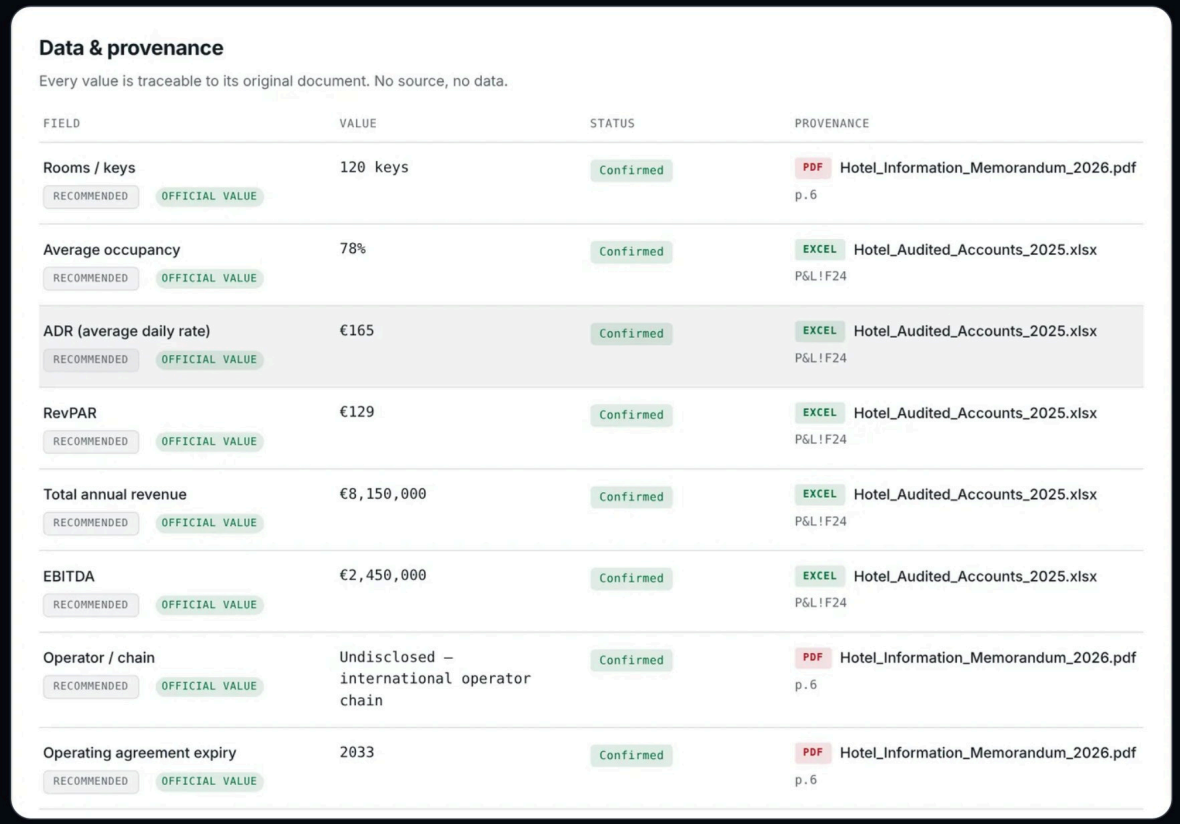

Identities revealed when both approve.

DATA INTEGRITY

Every figure traces to its source

Document, page and verbatim quote stand behind each data point. Conflicting figures are withheld, never averaged.

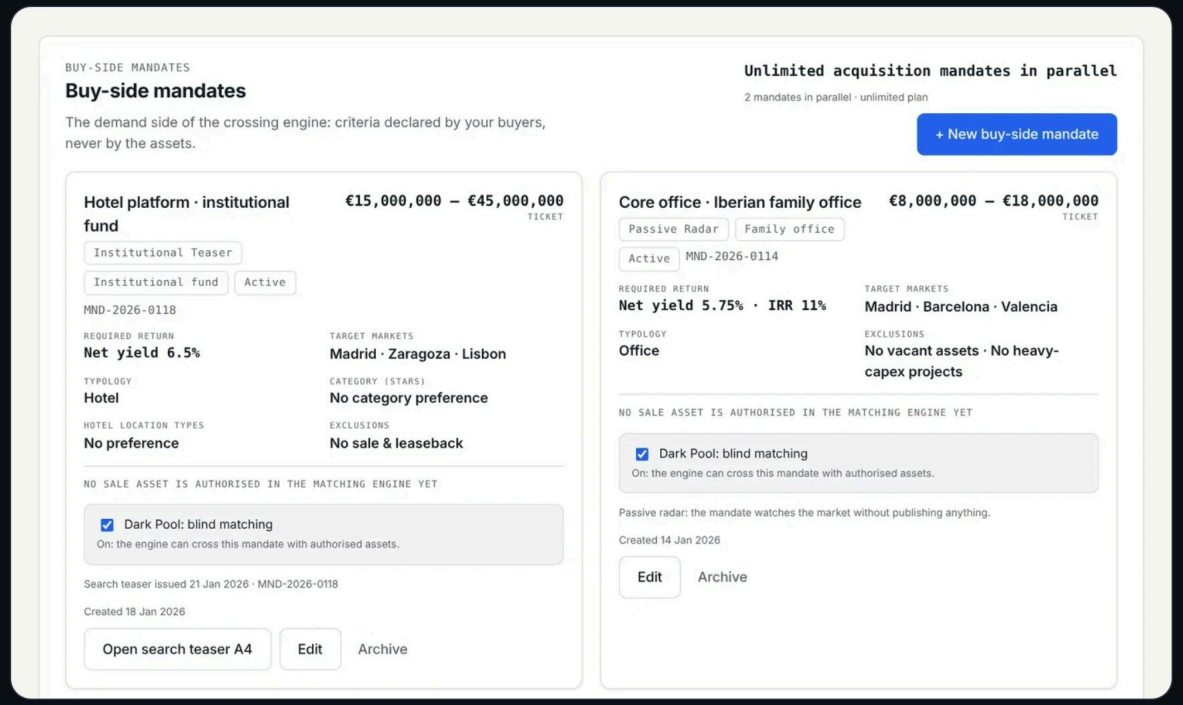

APP SCREEN · DEMO DATA

BUY-SIDE

Your acquisition mandate screens for you

Hard filters apply first, then a True Fit score. A match is proposed only when both sides clear their own threshold.

TRUE FIT THRESHOLD · ILLUSTRATIVE 85%

60% 100%

CONFIDENTIALITY BY DESIGN

Four rules the platform enforces

Nothing without a source

Every figure carries document, page and quote. Gaps are declared, never filled.

Identity protected

Names and contacts appear only after both parties approve.

You decide what is visible

Hide any field per teaser; it prints as “Under NDA”.

Your documents stay yours

Nothing you upload is used to train AI.

Hosted in the EU. Matching never reveals who you are before you approve.

PLANS

Two plans, sized to your team

Desk

TEAM

3	35	20
SEATS	ASSETS	MANDATES

- Dark Pool and confidential matching
- Match Advisor and Deal Rooms
- Every teaser format, with your branding

Institutional

ORGANISATION

10	100	Unlimited
SEATS	ASSETS	MANDATES

- Everything in Desk
- Blind screening
- White-label teasers
